Aspiring Full-Stack Developer pursuing a B.Tech in IT at SSN College of Engineering, with strong Java and Python skills. Experienced in both front-end and back-end development, along with UI/UX design using Figma. Passionate about building scalable web applications by integrating AI and ML.

WORK EXPERIENCE

PR Head SSN College of Engineering Led branding, communication, and outreach activities for departmental events, resulting in a 30% increase in event participation and enhanced visibility across social media platforms.	Aug 2025 - Present Association of Information Technology
Frontend Developer Intern Unified Mentor Private Limited Built responsive user interfaces using HTML, CSS, and JavaScript, converting Figma designs into fully functional web pages. Integrated Firebase for real-time data handling, user authentication, and secure backend services, reducing development time by 25%. Collaborated with a cross-functional team to optimize performance, resulting in a 40% improvement in page load speed and a 30% increase in user engagement.	Jan 2025 - Mar 2025 Cuddalore, India

EDUCATION

Bachelor of Technology SSN College of Engineering Member of AIT	Aug 2023 - Jan 2027
Higher Secondary A.R.L.M Matriculation Higher Secondary School Silver medal for tennis under BDG games in state level	Jun 2022 - Mar 2025

SKILLS

Design Tools: Figma, Canva
Soft Skills: Analytical thinking, Problem-solving, Ability to Multitask, Team leadership, Effective TimeManagement, Good Communication (Verbal and Written), Collaboration
Technical skills: Python ,Java ,HTML ,CSS ,Javascript ,React.js ,SQL,Git, Matplotlib, MongoDB,Machine Learning ,Flutter(basics),AJAX,Ruby Rails, JQuery,C,PL-SQL

PROJECTS

AI-Based Domestic Animal Skin Lesion Detection Designing and implementing an AI-based system to detect and classify skin lesions in domestic animals using machine learning and image processing using YOLO, Inception CNN, RESNET. Collecting, preprocessing and analyzing image datasets to train and evaluate model performance for accurate disease detection. Outcome: Increased operational efficiency by 50% in simulations, reducing manual errors and booking time through automation.	Apr 2026 - Present
AI-Based Virtual Rooms For Group Discussion and Learning Debate Using Voice Generation Developed an AI-powered virtual discussion platform that simulates group debates using voice generation and intelligent argument modelling for immersive learning. Outcome:presented research paper at International conference.	Oct 2025 - Feb 2026
Hotel Management System Developed a comprehensive hotel management application simulating core operations such as room booking, billing, and check-in/check-out processes. Structured backend data workflows and Designing a user-friendly interface to streamline hotel operations and improve service efficiency. Outcome: Increased operational efficiency by 50% in simulations, reducing manual errors and booking time through automation.	Jan 2024 - May 2024

CERTIFICATIONS

Best Paper Award, ICGTS International Conference by Karpagam College of Engineering	Mar 2026
Full Stack Development by Big learn	May 2025
Advanced Diploma in Python Programming by Sri Sabareeswarar pvt. Ltd.	Nov 2024
Python with Data Science by csc	Jun 2023
